

ABSTRACT

A distorted contents generating apparatus is provided. The distorted contents generating apparatus includes: an initial value generation unit for
5 generating an initial value used to generate a random number for a distorting filter; a random number generation unit for generating a random number for the distorting based on the initial value transmitted from the initial value generation unit; a filter generation
10 unit for generating a distorting filter based on the random number; a data filtering unit for distorting an original contents by filtering the original contents with the distorting filter; an encoding unit for encoding the distorted contents output from the data
15 filtering unit; a signal insertion unit for encrypting the initial value information generated by the initial value generation unit and inserting the encrypted filter initial value into the distorted contents; and an image correction unit for inserting image correction
20 information into the encoded distorted contents transmitted from the encoding unit.
